

WHAT CAN I EAT?

THINGS TO REMEMBER

A good meal plan includes a balance of carbohydrate (carbs), protein, and good fats. Carbs are the body's main source of energy. About half of the calories you eat each day will come from carbs.

Know Your Serving Sizes Measure Your Food

Blood sugar goes up when you eat. Your blood sugar will be easier to control if you eat a balance of foods from the different food groups in the right amounts (portions). You will get the sugar from food your body needs for energy without having high blood sugar problems.

Always Check Food Labels When You Shop
